Inspiring excellence in guided surgery
Discover our powerful implant planning and surgical guide design software exoplan – created to provide dental labs, dentists, implant specialists and surgeons with maximum flexibility. Based on the renowned exocad platform, exoplan guarantees a seamless digital workflow and the highest usability and performance.

exoplan guides dental professionals through the planning of implants and the design of surgical guides in one intuitive, digital workflow. Thanks to the open, vendor-neutral software architecture, open 3D scanners, 3D printers or milling machines can be used. Our integrated software solutions guarantee the seamless functionality of the digital workflow – from virtual, prosthesis-oriented implant planning with exoplan to designing surgical guides with our Guide Creator. In addition, exoplan users can take advantage of seamless integration with DentalCAD, exocad’s dental CAD software, to facilitate their planning and production of implant-supported, temporary and final prostheses.

exoplan – our high-performance, user-friendly open software solution for your implant planning and surgical guide design
Visualize, plan, create

Expand your service offerings with our innovative implant planning platform exoplan, and its extensive features. With exoplan, the choice is yours! You can either plan and produce surgical guides in-house or outsource the planning, design or manufacturing. exocad’s proven wizard-based workflows guide you through each step of the process. Benefit from our broad library of implant systems and prosthetic components, which offer you and your customers greater flexibility and choice.

In-house surgical guides – with Guide Creator module
Design your own surgical guides, and manufacture them in-house with your 3D printer or milling machine to maximize the return on hardware investments. Thanks to the standard data format STL, you have the freedom to choose your hardware and production center.

Free choice – comprehensive implant and component library
The exoplan library comprises over 250 different implant systems from top-tier manufacturers – such as Straumann, Dentsply Sirona, Zimmer and Camlog – as well as numerous local suppliers. Users can also access exocad’s comprehensive library of over 2000 prosthetic components.

Highest accuracy – alignment of scan data
Combine CBCT and surface scan data of a model by taking advantage of exoplan’s robust alignment tools. Additional refinement features maximize the accuracy of the aligned scans.

High usability – Wizard & expert modes

Thanks to exoplan’s intuitive guided approach, implant planning with consistent results has never been easier. exocad’s proven wizard-based workflow guides you through every step of the process. In exoplan’s expert mode, you can access extensive supplementary features and tools.

Ultra fast – exoplan’s DICOM viewer

Get enthused with exoplan’s high speed in processing large CBCT files. Due to optimized data handling algorithms and snappy graphics rendering, exoplan provides market-leading DICOM loading and visualization speed.

Secure – planning reports and surgical protocols

Facilitate your communication with surgeons through detailed reports and surgical protocols. Document every case and component configuration automatically.

One of the most exciting advantages of exoplan is its platform – the worldwide renowned and leading exocad CAD software. It makes exoplan a very proven and stable software application with numerous user benefits. exoplan can easily and seamlessly be integrated with all exocad products and modules related to implant indications. Therefore, our software solutions offer you the perfect symbiosis of prosthetics and implant planning – for reliable results that are cost- and time-efficient.
Exceptional flexibility with exoplan

**Control every step according to your requirements**

Implantology is an integral part of modern patient treatment. It can involve many steps and parties from implant planning to surgical guide design and manufacturing. Enjoy freedom of choice and manage your individual process for guided surgery with exoplan! Thanks to open, yet integrated solutions for digital dentistry, you are in control of the desired workflows. While surgeons may only need our exoplan planning tools, dental practices and laboratories benefit from the complete solution, including our Guide Creator module.

**No hidden costs**

Maximize your profits with our simple and transparent pricing model. exoplan has no click-fees and no hidden costs. With a low annual fee – which includes updates to future versions – you have access to our software for an unlimited number of cases. The modular software structure with our implant planning component and Guide Creator module ensure that you only pay for what you really need. Thanks to its open and vendor-neutral software architecture, you can use exoplan with your existing equipment, such as any open 3D scanner, milling machine or 3D printer.

**Our solid foundation – dental CAD software from exocad**

exocad was founded under the principle of being truly open and connected. As the worldwide leading OEM manufacturer for dental CAD software, our core competence is to establish interoperability standards. Manufacturers can thus integrate their databases, products, libraries and services. These integrations allow companies to focus on their core business while we continue to expand the depth of supported indications.
Your benefits at a glance

**For general dentists & implant specialists**

- Improve your restorative results
  exoplan supports prosthetic-driven planning
- Work with your preferred implant system
  exoplan offers extensive implant libraries
- Opt for in-house or outsourced production
  exoplan offers flexible workflows
- Make the most of your devices
  exoplan is compatible with open systems
- Engage patients during the implant planning process
  exoplan provides previews of the esthetic outcome
- Collaborate effortlessly with partners
  exoplan’s output can be directly imported in leading lab CAD/CAM systems
- Simplify your documentation
  exoplan generates automatic case reports
- Profit from an unlimited number of cases
  exoplan has no hidden costs or click fees
- Produce your own surgical guides
  exoplan supports open 3D printers or milling machines
- Benefit from our proven software platform
  exocad software has been established in labs for 10 years

**For dental laboratories**

- Expand your service offerings
  exoplan enables implant planning and surgical guide designs for in-house production
- Reduce rework and corrections
  exoplan allows prosthetic-driven planning
- Create predictable restorations
  exoplan accesses exocad’s comprehensive library of over 2,000 prosthetic components
- Work with your existing equipment
  exoplan supports file formats for open 3D printers and milling machines for surgical guide production
- Improve collaboration
  exoplan facilitates the communication with your clients for improved and predictable outcomes
- Integrate workflows seamlessly
  exoplan interoperates with exocad’s DentalCAD
- Profit from an unlimited number of cases
  exoplan has no hidden costs or click fees
- Produce your own surgical guides
  exoplan supports open 3D printers or milling machines
- Benefit from our proven software platform
  exocad software has been established in labs for 10 years
