

exocad is a leading dental software company, continuously pushing the boundaries at the forefront of digital dentistry. Founded in 2010 as a spin-off of the world-famous Fraunhofer Institute for Computer Graphics Research and now part of [Align Technology](#), we develop CAD software solutions for the dental industry. Labs and clinics in more than 150 countries rely on our software portfolio to design and create both functional and esthetic dental restorations. Find out more about us and our products at [exocad.com](https://www.exocad.com).

To strengthen our exocad DevOps Team we are looking for you as a

Working Student DevOps/Tools (m/f/d)

We are looking for a highly motivated, responsible, and passionate Working Student for DevOps or Tools Engineering with great interpersonal skills to join our DevOps Team.

In this role, you will...

- Create and improve our internal tools and CI/CD pipelines to accelerate and optimize our software engineering processes while we move from research code towards production
- Create internal tools and automations to solve workflow problems for our various teams
- Participate in environment management and operations activities
- Develop container and cloud-based infrastructure

The personal requirements

- Bachelor's or Master's student in a relevant field
- Understanding of DevOps processes, Git workflows, or the "automate everything" mantra
- First experience with automating application deployment and managing Windows and Linux based applications is a plus
- Experience with Git or similar version control systems
- First experience with clouds: AWS, Azure, etc
- Excellent communication and documentation skills
- Results-driven with strong commitment
- Good language skills in English

Nice to have:

- Experience with Terraform or similar IaC tools
- Understanding of Software Development Lifecycle, experience in building CI/CD pipelines
- Experience with continuous integration tools like Jenkins, Bamboo, TeamCity
- Experience with scripting in Groovy, Bash, Python, etc
- Experience with Jenkins development (Pipeline development, declarative and scripts)
- Experience with Cloudbees CI and CD
- Experience with configuration management tools like Chef, Puppet, Ansible
- Experience with containers: Docker, K8s
- Experience with the Atlassian Suite: Jira, Confluence, Bitbucket
- Deeper experience with Terraform: Module development, Terragrunt, Terraspace, etc
- Good language skills in German

What we offer you

- Exciting and wide range of tasks in a dynamic and growth-oriented software company
- Flat hierarchies and efficient decision-making processes
- A positive working atmosphere that promotes both individual freedom and responsibility
- Strong team spirit
- Modern offices and cutting-edge work equipment
- Flexible working and home office
- Education and training
- Sport and work life balance

- Free drinks and snacks
- Canteen with own cook
- Corporate events
- Job ticket
