

exocad Insights 2020: Success Of The Annual Event For Manufacturers And Users Of Dental CAD/CAM Technologies

DARMSTADT, Germany, September 28, 2020 – "A Decade of Digital Innovation" was the motto of the two-day event exocad Insights on September 21 and 22, 2020, held for the first time in a hybrid format, to comply with the safety guidelines of the COVID-19 pandemic. With approximately 300 dental technicians, dentists and over 40 partner companies, exocad celebrated its tenth anniversary at the international congress center darmstadtium in Darmstadt, Germany, in strict compliance with the applicable distance and hygiene rules imposed by the German health authorities. A further 1600 users of digital technologies in laboratories and practices from 55 countries followed Insights 2020 online on their PCs, tablets and smartphones.

exocad assembled a varied program, featuring international digital experts and exciting highlights around digital dentistry. On Monday, this included the presentation of the renowned Cellerant Best of Class Technology Award 2020 for *ChairsideCAD*, exocad's software for the clinical environment, which received this prestigious award for the second consecutive time reflecting its open software architecture. *ChairsideCAD* is the first CAD software application to have received the Cellerant Best of Class Technology Award.

The presentation of the new exocad software releases, *DentalCAD 3.0 Galway* and *exoplan 3.0 Galway* was received with big applause by the exocad community both onsite and online. With the *Galway* release, the user interface has been extensively revised, while functionality, speed and automation were further improved. Digital experts from Germany and abroad presented the new features based on their own cases.

More than 40 partner companies took the opportunity provided by exocad Insights 2020 to present their latest developments in the fields of scanners, milling machines and 3D printers online and offline, including several world premieres. exocad Insights 2020 also established itself as a leading event for manufacturers and users of digital technologies in laboratories and practices.
