

exocad Insights postponed

New date on September 21 and 22, 2020

DARMSTADT, Germany, February 28, 2020 - Due to the spread of the Corona virus worldwide, exocad GmbH has decided after careful consideration to postpone the Insights 2020 event planned for mid-March. The new dates for the global CAD/CAM event are September 21 and 22, 2020. The venue remains unchanged at darmstadtium in Darmstadt. The cooperation partners of exocad Insights 2020 support this move.

The significant increase of Covid-19 cases in Europe this week has required a new assessment of the situation in close consultation with the participating industry partners. There are increasing travel restrictions for various countries, making it considerably more difficult for visitors to attend the event in Darmstadt. As it can be expected that within the next few weeks there will be further significant restrictions for major events, exocad has decided to postpone the event. This decision is also supported by the 43 cooperation partners.

"The safety and health of our participants, partners and employees is our top priority. In view of current developments and the increased spread of the Corona virus, we have decided to postpone the global event exocad Insights until September", explains Novica Savic, CCO of exocad.

The two-day event, which is aimed at both dental technicians and dentists, offers a varied program consisting of software education, partner sessions and international guest speakers. Insights 2020 focuses on the almost limitless possibilities of exocad's open software platform, on which intraoral and model scanners, milling machines, 3D printers and DVT devices from different manufacturers can be combined to form a consistent

digital workflow. Information about the current trends in the CAD/CAM industry can be obtained from the 43 international partner companies on site. An evening with dinner and live music will round off the event in the festive presence of the approximately 850 international participants.

In coordination with darmstadtium, the 21st/22nd September has been chosen as the new dates for exocad Insights. All tickets remain valid for the new dates.

Further information about the event, program and ticket sales are available on exocad.com/insights.

About exocad GmbH

exocad GmbH is a dynamic and innovative software company committed to expanding the possibilities of digital dentistry and providing OEMs (Original Equipment Manufacturers) with flexible, reliable, and easy-to-use CAD/CAM software for dental labs and dental practices. exocad software has been chosen by leading OEMs worldwide for integration into their dental CAD/CAM offerings, and thousands of exocad *DentalCAD* licenses are sold each year.
